Good day,

R&D, was completing a release for security patches, which now has been scheduled and will be complete by end of month after validation testing.

### Note Public Report on Imminent Release:

<https://supportannouncement.us.dlink.com/announcement/publication.aspx?name=SAP10205>

Following Chinese New Years next week I will have status update, due to the number of affected SKUs response takes time.

Thank you for the report.

Hello William,

Is there any update for previously reported issues.

Thanks,

Yaowen

主题: Re: Vulnerability report on DAP-series routers

I just discussed this issue with R&D, I should have updates later this week.

Thank you for your patients,  
Regards,  
William Brown

Thank you for the report.

I will raise it to our R&D for validation and plan of correction.

These production is going through some firmware patches that are related, and some may have been addressed.

I will reply once I have further information.

Regards,  
William Brown
